# LearnCube

We make it really easy to start teaching languages online.

Our blended learning solution combines the benefits of live classes and self-paced interactive courses, increasing business profit margins and improving outcomes for students.

Benefits to schools using LearnCube

Reach a global market:
Language education companies can easily expand online, beyond their physical limits

Fill the skills shortage gap:
Employ native speakers from anywhere in the world to deliver live online classes

Improve student outcomes:
Blended learning has proven to improve student results, provide 24/7 access to online courses and live help when students need it most

Increase profits:
Enroll more students and improve efficiency by selling course packages that utilize both live teacher time and self-paced courses, reducing the teacher labour costs

Create your online school using your own logo, colours and branding.

Online live classes.

Teach students located anywhere in the world using our dynamic online classroom platform.
